Abstract

We need to laugh in our day-to-day life for healthy life. For entertainment there are too many options so here we can read jokes as many times as we want by clicking on just 1 button. This documentation is all about the user interface wireframe, here the home page of our frandom jokes app project is explained with proper input.

1. Web Interface

- Our web page is an interface where user click on button and then joke is displayed.

2. Result Page

After the user click on the submit button they will get the result being displayed on the page. The user can refresh the page and when they again click on button they will get another joke.

A wireframe of a result page, represented by a solid blue rectangle. In the center, there is a single line of white text: "If Bill Gates had a dime for every time Windows crashed ... Oh wait, he does."

If Bill Gates had a dime for every time Windows crashed ... Oh wait, he does.

A wireframe of a result page, represented by a solid blue rectangle. In the center, there is a single line of white text: "Knock, knock." "Who's there?" [very long pause] "Java."

"Knock, knock." "Who's there?" [very long pause] "Java."
