Objective

- We need to laugh in our day-to-day life for healthy life. For entertainment there are too many options so here we can read jokes as many as we want by clicking on just 1 button.

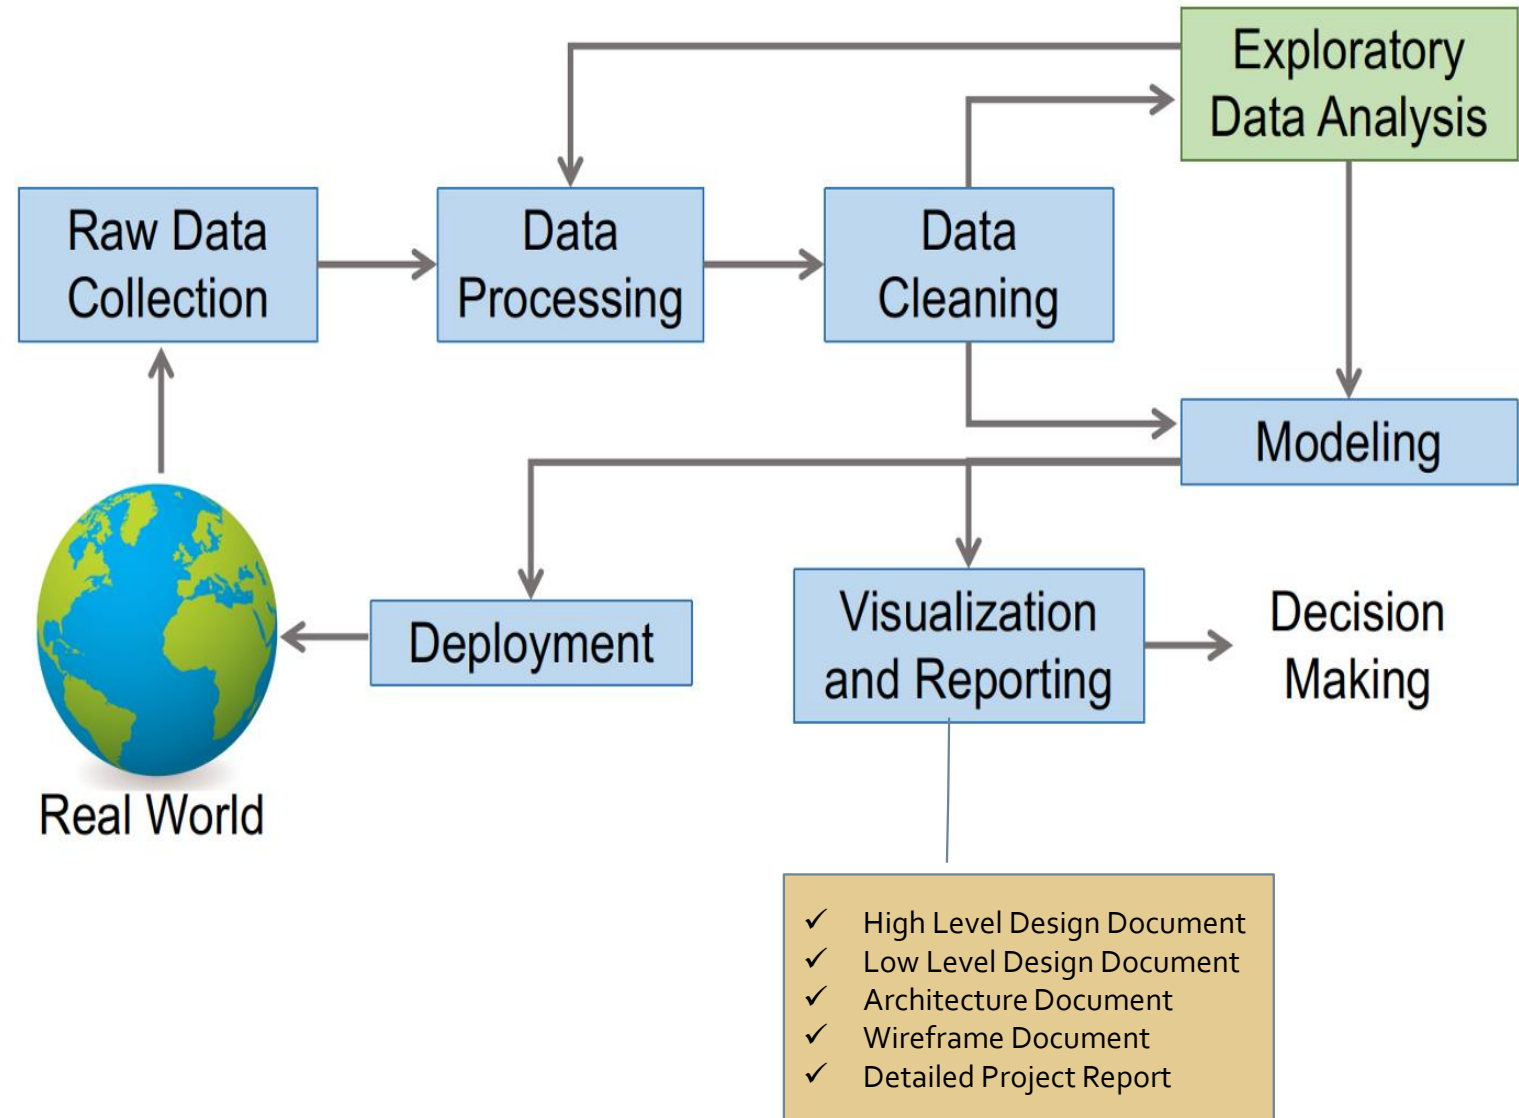

Project Details

Project Title	Random Joke App
Technology	Frontend Javascript
Domain	Entertainment
Project Difficulty Level	Beginner
Programming Language Used	HTML
Tools Used	React

Problem Statement

The main objective of this project is to create a simple random jokes app that displays a random joke everytime user clicks on fetch a new joke button. You can use any Jokes API Because of this you dont need to go anywhere to read jokes , you can read as many jokes as you want to read. By just clicking on 1 button you get many jokes at 1 platform.

Architecture

Conclusion

» It is a source of entertainment, we can get n number of jokes at 1 platform by just clicking on 1 button.

Thank You!
